The DW-200 dual technology wall switch sensor combines the benefits of passive infrared (PIR) and ultrasonic technologies to turn lights ON and OFF based on occupancy. It contains two relays for controlling two independent lighting loads or circuits and a variety of features.

Features & Benefits

High sensitivity and dense coverage for exceptional performance

Color-matched lens and low profile for appealing design

Defaults to Auto-ON to 50% operation for maximum energy savings

Two relays for control of two separate lighting loads or circuits

Selectable operation, walk-through, test and presentation modes for increased energy savings and convenience
