On-Q

30-inch Plastic Enclosure with Trim Ring and Hinged Door

Part No. ENP3050NA

Our 30-inch plastic enclosure is our most popular model and ideal for single family and production homes. It is lightweight, low-profile, made with a robust, wireless transparent ABS plastic material that is designed to integrate wired and wireless devices into traditional structured wiring installations. It is easy to install and includes a trim ring to ensure a professional look even with the messiest of drywall cutouts.

Extra venting along the vertical panel of the hinged door allows for superior heat dissipation and our universal mounting grid and top and bottom knockouts take the headache out of cable management and power accessibility making it the perfect enclosure for an array of devices such as routers, modems, switches as well as power strips and more.

Features & Benefits

Made with ABS plastic, the enclosure is designed to integrate wireless devices without interference

Universal mounting grid maximizes compatibility with 3rd party products without additional brackets.

Staggered mounting tabs allow multiple enclosures to mount in adjacent stud bays.

Lockable with provided screws.

UL listed.

Extruded cover adds 1.2" of depth for cable headroom and 3rd party device compatibility.

Extra venting along the vertical plane of the door allows for superior heat dissipation.

Cover includes metal hinge that attaches to enclosure in seconds.

Tapered design allows enclosures and covers to stack for efficient transportation and warehousing
