

Wattstopper
DLM Dual Tech Wall Switch, Occ Sensor, 2-Button, Pre-Eng ON/OFF w/Arrows, White
Part No. LMDW-102-W-ENG2

LMDW-100 Series Digital Dual Technology Wall Switch Occupancy Sensors use PIR and ultrasonic technology to detect occupancy for energy-efficient control of lighting and plug loads. They also include one or two switch buttons for manual control of selected loads, and are part of a Wattstopper Digital Lighting Management (DLM) system.

Features & Benefits

2-button Digital Dual Technology Wall Switch Occupancy Sensor

LMDW-100 Series Digital Dual Technology Wall Switch Occupancy Sensors use PIR and ultrasonic technology to detect occupancy for energy-efficient control of lighting and plug loads. They also include one or two switch buttons for manual control of selected loads, and are part of a Wattstopper Digital Lighting Management (DLM) system.

Dual Technology sensor with On/Off button(s) to switch selected load(s)

Component of Digital Lighting Management integrated control system

Quick access to Push n' Learn for system personalization

Digital sensor with LCD display and programming pushbuttons

IR transceiver for wireless configuration

Plug to other components using Cat 5e cables with RJ45 connectors eliminating wiring errors and remote control

Specifications

General Info

| | | | |
|--------------------|------------------|--------------------|-------|
| Product Line | Wattstopper | Color | White |
| UPC Number | 754182945375 | Country Of Origin | China |
| Features | Pre-Engraved | Number of Switches | 2 |
| Application Sector | Commercial | Standard | UL |
| Type | Occupancy Sensor | | |

Additional Information

| | | | |
|-----------------------|-----------|-------------------|--------|
| RoHS Conformant | Yes | Security | Yes |
| Technical Information | | | |
| Sensor Type | Occupancy | Number of Buttons | 2 |
| Amperage | 20 mA | Indoor/Outdoor | Indoor |
