

Wattstopper
Discontinued - DLM Photocell Input Module w/Analog Photocells
Part No. LMIO-301

The LMIO-301 photocell input module is an accessory for a networked Digital Lighting Management (DLM) installation that allows an LMSM segment manager or LMCP panel to read ambient light levels for use in controlling exterior lighting or interior lighting installed in brightly daylit spaces such as atriums. The LMIO-301 works in conjunction with either the LMPO-200 exterior or LMP5-6000 skylight low voltage photocell heads.

Features & Benefits

| | |
|---|---|
| Module and selected photocell read light levels for exterior or interior applications | Works with LMSM segment manager or LMCP panel |
| Connects to segment network via DLM local network connection | Compatible with LMCP panels and LMSM segment managers |
| DIN rail clamp allows mounting in LMCP Series panel | Works with a choice of photocells for exterior and skylight locations |
