

Pass and Seymour PlugTail® Specification Grade Tamper-Resistant 15A Duplex Self-Test GFCI Receptacles with SafeLock® Protection, Light Almond

15A GFCI works with the existing three-wire PlugTail connectors creating a non-feed thru application for facility owners. At rough-in, just install the same right-angle connector for GFCI and receptacle openings. PlugTail® devices and connectors mean that device installation is the same regardless of skill level of the installer. The UL-Listed connectors are keyed to ensure proper wiring installation into each receptacle.

Features & Benefits

Conducts an automatic test every three seconds, ensuring it's always ready to protect. If the device fails the test, the indicator light flashes to signal that the GFCI should be replaced. It also has our proven SafeLock® Protection feature: if Faster, more reliable installation critical components are damaged and protection is lost, power to the receptacle is disconnected

No exposed terminals create a finger-safe application before, during, and after installation

Built-in connector features large brass terminal blades to ensure consistent, reliable electrical connections to PlugTail Connector
