

Male Conduit Grip 2 Diameter Insulated

Features & Benefits

Liquid-Tight grips are woven of stainless steel mesh with zinc plated steel or malleable iron bodies and nuts for corrosion resistance. They are used to connect liquid-tight flexible conduit to electrical enclosures to prevent conduit Mesh pullout. Each fitting is supplied with an insulated throat to provide conductor insulation and protect against damage Length: by flexing, heat expansion and contraction. Liquid-Tight grips are recommended in the wiring of motors and any 7.5 electrical enclosure where liquid-tight conduit is subject to motion or strain.

Specifications

General Info

Product Line	Pass & Seymour	Country Of Origin	Mexico
Construction	Support and Strain Relief Grips, Various Types of Pulling	Application Sector	Industrial
Standard	UL/CSA Approval (consult factory)		

Listing Agencies / 3rd Party Agencies

CSA Listed Yes

Technical Information

Capacity	Various Cable Diameter Ranges	Mounting	Consult the Factory for Mounting Recommendations
----------	-------------------------------	----------	--

Load Strain Relief Grips are designed to prevent tension from being transferred to junctions and terminals on electrical cord, cable and conduit, therefore providing a more secure electrical structure.
