

On-Q
Discontinued - Single-Port RF Digital Cable Amplifier
Part No. VM2201V1

The Single-Port RF Digital Cable Amplifier improves the strength of the video signal throughout the house. It is compatible with existing and future networks such as MoCA, VoIP, and DOCSIS 3.0. It ships with a power supply and two coax jumper cables.

Features & Benefits

Exceeds the performance standards set by major cable providers	Ultra low noise figure (less than 3 dB) provides clean amplification of weak signals
For use with MoCA, VoIP, and DOCSIS 3.0 networks	Auto-seizing F-port ensures full contact pressure on the center conductor for maximum reliability
Ships with power supply and two coax jumper cables	Exceeds all SCTE standards

Specifications
