

On-Q
Discontinued - Power Supply In-Wall Extension Kit, Light Almond
Part No. WP9000LA

The Power Supply In-Wall Extension Kit allows for code compliant installation of most wall mounted low voltage products that require an external power supply. The kit allows power supplies to connect at receptacle height in the wall with a keystone ada

Features & Benefits

- Conceals cables inside the wall behind flat panel TV, amplifier, or other audio/video devices
- Keeps power supplies out of sight and cables concealed in the wall
- Use with power supplies up to 48vDC at 100 watts
- Supports all low voltage power supplies and connection types
- Supports LED accent lighting kits
